

# HERMAN NINO LUNA IV

## SENIOR FRONTEND DEVELOPER

I am passionate, outgoing person who has keen interest in software development. Since starting programming during college, I found it interesting and fun to solve the challenges I often came across. I'm also a firm believer that researching on the latest trends in software development is essential to the creation of a great website.

## WORK EXPERIENCE

### OPTIMUM SOLUTIONS PTE LTD

#### CONSULTANT SOFTWARE DEVELOPER

SEPTEMBER 2023 - PRESENT

I was deployed to one of the leading banks in Singapore, where I worked on front-end development tasks such as building components, updating legacy code, and resolving long-standing issues. My most notable achievement was designing and building a virtual keyboard from scratch, which was successfully implemented across multiple countries. I also led the Jest library update and improved the effectiveness of several tests.

### I-CUBE DIGITAL SOLUTIONS

#### SENIOR FRONTEND DEVELOPER

JANUARY 2022 - JULY 2023

I continued my work after Pinion was acquired by this company. I was also part of a project that introduced an in-house application to streamline employee management, allowing users to track leave credits and download all their payslips within a single platform.

### PINION SOFTWARE CONSULTING AND APPS INC.

#### SENIOR FRONTEND DEVELOPER

FEBRUARY 2018 - JANUARY 2022

I was assigned as the Frontend Team Lead for a project with one of our top clients. Collaborating with developers from around the world provided me with valuable insights and techniques in web development. For this project, we utilized ReactJS as our primary library, building around it with standard plugins such as Redux, React Router, React Beautiful DnD, DraftJS, and many more.

### GREATFIT SERVICES INCORPORATED

#### FRONTEND DEVELOPER

AUGUST 2017 - FEBRUARY 2018

I maintained and updated legacy web applications built with jQuery, optimizing their performance using GTmetrix to ensure a seamless user experience. Additionally, I was tasked with redesigning and rebuilding two major applications using Vue.js. In this process, I focused on creating reusable components and implementing easy-to-configure project setups for improved scalability and efficiency.

### GOLDEN HORSE BUSINESS SOLUTIONS INC.

#### SENIOR WEB DESIGNER / FRONTEND DEVELOPER

JULY 2015 - MAY 2017

I mentored a team of Junior Web Designers. As a team, we've created design, website mock-ups, Android application using JAVA, integrated API to applications, and different static webpages such as dashboard. Also, we've supported the UX team to deliver an effective experience across devices. The tools and frameworks used for our projects are photoshop, illustrator, android studio, brackets (code editor), AngularJS, and ReactJS. At all times, I ensure that our work meets the clients' standards.
